### **DETAILED ACTION**

1. Currently pending in the instant application are claims 29, 31, 36-38 and newly added claims 49-60.

#### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 29, 31 and 55-60, drawn to a semiconductor device, classified in class 257, subclass 678+.
- II. Claims 36-38 and 49-54, drawn to a method of making a semiconductor device, classified in class 438, subclass 106+.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the method claims recite a process of fabricating a semiconductor device, comprising the steps of attaching a semiconductor chip to a support member using a die-bonding material and encapsulating the chip with a resin. The device claims, 29, 31 and 55-60, are silent as to encapsulating thus

providing a semiconductor device which is made by a process different than in method claims 36-38 and 49-54.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
